USEPA ID No. ALD 000 828 848
Terracon Project No: E1167085

Dear Mr. Wiggins:

Terracon Consultants, Inc. has prepared this Community Involvement Plan (CIP) per your request for the above referenced site.

This plan has been prepared to be consistent with the following EPA guidance as stated in the executed RCRA Section 3008(h) Administrative Order on Consent (effective 8/1/16):

<http://www.epa.gov/oswer/engagementinitiative/related.htm>
<http://www.epa.gov/wastes/hazard/tsd/permit/pubpart/manual.htm>

The CIP will serve as guidance to engage the public and promote understanding and participation in the RCRA process. If you have any questions, please call me.

Sincerely,
Terracon Consultants, Inc.

Terrell W. Rippstein, AL-PG
Principal Geologist

EXECUTIVE SUMMARY

Bluestone Coke, LLC (Bluestone Coke) has prepared this Community Involvement Plan (CIP) to inform and involve the community in the technical environmental activities being performed on the Bluestone Coke facility property located at 3500 35th Street North, Birmingham, Jefferson County, Alabama.

This Community Involvement Plan (CIP) has been prepared to facilitate communication between the community and Bluestone Coke. Bluestone Coke will utilize the community involvement activities outlined in this plan to ensure that residents are reasonably informed of milestones associated with the technical work being performed under the RCRA Section 3008(h) Administrative Order on Consent (effective 8/1/16) [AOC].

The facility has a long history of community involvement. Like all communities, the North Birmingham community has specific and unique circumstances and Bluestone Coke has developed the CIP utilizing public participation activities that have been successful in this specific community and are consistent with EPA community engagement guidance. Bluestone Coke will use a variety of ways to engage the public on the activities being conducted at the Bluestone Coke Plant under the AOC, including maintaining an information repository, distributing fact sheets at key milestones, and operating a telephone information line.

1.0 INTRODUCTION

1.1 What is RCRA?

RCRA is the Resource Conservation and Recovery Act, which was enacted by Congress in 1976. RCRA's primary goals are to protect human health and the environment from the potential hazards of waste disposal, to conserve energy and natural resources, to reduce the amount of waste generated, and to ensure that wastes are managed in an environmentally sound manner. RCRA regulates the management of solid waste (e.g., garbage), hazardous waste, and underground storage tanks holding petroleum products or certain chemicals.

1.2 Community Involvement Plan

This Community Involvement Plan (CIP) has been prepared to facilitate communication between the community and Bluestone Coke, LLC (Bluestone Coke). Bluestone Coke will utilize the community involvement activities outlined in this plan to ensure that residents are reasonably informed of specific milestones associated with the work being performed under the RCRA Section 3008(h) Administrative Order on Consent (effective 8/1/16) [AOC]. Although there are no regulations requiring public participation under 3008(h) Orders, Bluestone Coke has agreed to develop and implement this CIP to facilitate communication between the community and Bluestone Coke.

This CIP will be updated on an annual basis.

2.0 SITE BACKGROUND

2.1 Site Description

Bluestone Coke is located in North Birmingham, Jefferson County, Alabama (Figure 1). The site occupies approximately 400 acres, with the main entrance near the intersection of 35th Avenue and Shuttlesworth Drive in Birmingham.

Bluestone Coke is a leading producer of coke that is used in blast furnaces and foundries. The majority of this product is purchased by steel producers who use it to make their products. Bluestone Coke uses methods and technology that are among the most advanced in the industry.

2.2 Site History

The roots of the facility can be traced back to 1881 when Sloss-Sheffield Steel and Iron Company first began producing pig iron in Birmingham, Alabama. In 1920 where Bluestone Coke sits today, Sloss-Sheffield Steel and Iron Company built two modern coke oven batteries, at the time considered state-of-the-art, to serve its own needs as well as those of other customers. As Birmingham's steel industry grew, so did the need for furnace coke, which prompted the construction of three more batteries at the site during the 1950s.

As American industry evolved in the ensuing years, so did Bluestone Coke (formerly known as Sloss Industries). Today, Bluestone Coke is a highly efficient, technologically advanced operation serving a variety of customers in the furnace and foundry markets.

The operation now consists of three batteries with a total of 120 coke ovens which produce approximately 460,000 tons of coke each year. A highly experienced operating staff provides assurance of adherence to strict operating, environmental, and safety standards.

The original coke manufacturing facility began operation in 1920 as Sloss Sheffield Steel and Iron Company. Beginning in 1952, the company experienced a series of corporate transactions and restructurings that culminated in the name change to Walter Coke in May 2009. ERP Coke purchased the facility from Walter Energy in February 2016. ERP Coke changed its name to Bluestone Coke in October 2019, after an ownership change in August 2019. The following operations have occurred at the facility:

- Coke manufacturing has occurred since 1920 and 120 coke ovens continue to operate.
- Chemical manufacturing began at the facility in 1948 and all chemical manufacturing operations ceased in 2002.
- An iron blast furnace that produced pig iron from iron ore began operation in 1958; blast furnace operations ceased in 1981, and the blast furnace was decommissioned in 1984.
- The mineral wool plant which manufactured mineral fiber used in the production of ceiling tile and insulating products was built in late 1947 and was decommissioned in 2010.

- The biological treatment facility (BTF), designed to treat wastewater generated at the facility, was constructed in 1973-74, first received wastewater in 1975 and is still in operation today.

The land around the Bluestone Coke facility is zoned for industrial and residential use. Before 1957, the area was primarily industrial, with significant numbers of other facilities, including coke and cement manufacturing plants, pipe manufacturing plants, and limestone quarry operations. Residential neighborhoods were constructed on properties in the area of Bluestone Coke and these other industrial operations only after 1957 (EPA, 1990). The realistic future land use for the Bluestone Coke facility is industrial.

2.3 1989 RCRA Order

The following provides a brief chronological overview of the regulatory history associated with the 1989 RCRA Order:

- August 1989 - EPA completed the RFA.
- September 29, 1989 - Section 3008(h) Administrative Order 89-39-R was issued to Sloss to perform an RFI and to perform a Corrective Measures Study (CMS).
- October 24, 1990 – After a challenge to the 1989 Administrative Order, EPA and the company entered into a Modification to the Administrative Order and Settlement Agreement, which then governed work at the facility.
- 1990 to 1994: Sloss initiated planning for the RFI to characterize the nature, extent, and rate of contaminant migration from the identified SWMUs, and submitted a draft RFI Work Plan to EPA for review and approval.
- The RFI Work Plan, which outlined an approach for investigating the 39 SWMUs, was approved by EPA in 1994.
- 1995 and 1996: A Facility-Wide Investigation (FWI) was completed to develop a conceptual hydrogeologic and hydrologic model of the facility.
- 1996 to 1999: RFI field investigations were conducted and reports submitted to EPA.
- 2000 to 2001: Phase II field investigations were conducted.
- 2002: Interim Remedial Measures (IM) Work Plan for the Chemical Plant was submitted to EPA.

In an effort to help EPA complete its environmental indicator (EI) determinations for the site and thereby help EPA meet its Government Performance Results Act (GPRA) goal to show that human exposures and groundwater releases were controlled by September 30, 2005, Walter Coke completed the following activities that are specific for EI determination:

- February 2005 – Walter Coke submits the Proposed EI Sampling Plan.
 - March 2005 – EPA approves the EI Sampling Plan.

- July 2005 - Walter Coke submits the Consolidated Overview of Environmental Data in Support of the EI Determination.
 - September 30, 2005 – EPA issued the final EI evaluation of the facilities status in relation to RCRA Information System (RCRIS) CA Codes 725 and 750. The CA 725 decision was noted as “Yes”; the CA 750 decision was noted as “No”.

Following the completion of the EI activities, EPA and Walter Coke focused on the next phase of RFI activities.

- 2006: EPA issued technical comments on several RFI reports.
- 2007 – Phase III RFI Work Plan prepared and approved by EPA.
- 2009 – Walter Coke submits the Draft Phase III RFI Report.
 - June 2009 – Walter Coke submits Addendum to the Phase III report.

2.4 2012 and 2016 RCRA Order

A RCRA Section 3008(h) Administrative Order on Consent (the “2012 Order”) with the effective date of September 24, 2012, was signed by Walter Coke and the EPA. In 2016, ERP Compliant Coke, LLC contractually assumed the RCRA Order obligation of Walter Coke through bankruptcy proceedings and the RCRA Section 3008(h) Administrative Order on Consent (the “2016 Order”) was reissued and modified to reflect the name change to ERP Compliant Coke, LLC and was signed by ERP Coke and the EPA. The objectives of the 2016 Order remained the same as previously outlined in the 2012 order. The 2012 Order declared that all of the approved investigation tasks of the RFI Work Plans required by the 1989 Order had been completed by Walter Coke and that the 1989 Order was terminated and no longer in effect. In the 2012 Order, there are 45 SWMUs, 6 AOCs, and 5 SMAs at the facility (Figure 2) listed. On October 8, 2019, ERP Compliant Coke, LLC changed their name to Bluestone Coke, LLC. Bluestone Coke has assumed responsibility for performing activities under the Order.

As part of the Order, a Corrective Measures Study (CMS) is being prepared for each of the 5 SMAs to evaluate the need, if any, for corrective measures.

- CMS SMA 1
- CMS SMA 2
- CMS SMA 3
- CMS SMA 4
- CMS SMA 5

In addition to the CMS, Interim Measures (IM) are being conducted in the area of SMA 4 to address groundwater impacts largely confined to the site. The IM consists of hydraulic control of the groundwater in AOC D (FCP Groundwater Plume), groundwater sampling and analysis, and a Vapor Intrusion (VI) Study. The EPA has approved the IM. Hydraulic Control and groundwater

monitoring has been ongoing since April 2014. The VI was completed on February 5, 2015 and the EPA approved the report on February 18, 2015. The VI Report concluded that no further action was needed with respect to potential vapor intrusion.

3.0 COMMUNITY BACKGROUND

3.1 Community Profile

According to the US EPA Enforcement & Compliance History Online (ECHO, echo.epa.gov), the community demographics within a 3-mile radius of the Bluestone Coke facility are the following:

- Households – 12,897
- Housing units – 16,130
- Total persons – 34,538
- Population density – 1,227 per square mile
- Households on public assistance – 480
- Percent minority – 84%
- Persons below poverty level – 22,166

Figure 3 illustrates the boundaries of the Fairmont, Harriman Park, and Collegeville neighborhoods. In addition, the location of the Bluestone Coke Plant is shown.

3.2 Community Concerns

The community can express their concerns, if any, via telephone to Bluestone Coke. The phone number for contact is 205-808-7712. The community can express their concerns or request information. The community can request information such as contact information for EPA or other governmental agencies and other related site-specific environmental issues.

Past community concerns that have been brought to the attention of and addressed by Bluestone Coke include: truck traffic; dust control; and site aesthetics (i.e., new fencing).

The community feedback received will be reviewed and used as appropriate to update or revise the CIP. We will also continue to evaluate how feedback is received and information is dispersed to the community (i.e., texting, social media, physical signage, etc.)

4.0 ACTION PLAN

More than 5,000 facilities in the United States are subject to RCRA corrective action. The degree of cleanup necessary varies significantly across these facilities. Few of these activities will follow

exactly the same course; therefore, program implementers and facility owners/operators must be allowed significant latitude to structure the corrective action process, develop cleanup objectives, and select remedies appropriate to facility-specific circumstances. Similar latitude must be allowed in determining the best approach to public participation based on the history and uniqueness of each facility.

The facility has a long history of community involvement. Based on this history and what has shown to be the most effective and consistent with EPA community engagement guidance, Bluestone Coke will use a variety of ways to engage the public on the activities being conducted at the Bluestone Coke Plant under the Administrative Order on Consent, including maintaining an information repository, distributing fact sheets at key milestones, and providing telephone contact information.

The following entities will be used as channels for reaching the community and offering opportunities for input from the community:

- US EPA
- ADEM
- Local elected officials
- Local churches
- The neighborhood associations of Harriman Park, Collegeville, and Fairmont.

The contact information for these entities is included in Section 6.0 and Appendix A.

The following sections describe public involvement activities that Bluestone Coke will use, their purposes, and descriptions of how the activities will be used.

4.1 RCRA Technical Milestones

The RCRA technical milestones were presented in Section 2.4. As each Report is finalized and approved by EPA, one or more of the community involvement activities provided in the following sections will be conducted by Bluestone Coke. In addition to the technical milestones, Bluestone Coke will use these community involvement activities whenever the need arises to engage or inform the public about events or other specific concerns and issues that arise.

4.2 Information Repository

An Information Repository is a place where the public may read and review site information, including documents that are the subject of public comment.

For this project, the information repository is located at:

North Birmingham Public Library, 2501 31st Avenue North, Birmingham, Alabama 35207
Phone (205) 226-4025

This information repository also has previously conducted reports.

4.3 Fact Sheets

Bluestone Coke plans to prepare and distribute fact sheets at key milestones (e.g., Interim Measures Report, Corrective Measures Study) over the course of the project. The fact sheets are intended to inform the community of comment opportunities and important site activities. These fact sheets will be provided to local churches and to the neighborhood associations of Harriman Park, Collegeville, and Fairmont. A contact information list is provided in **Appendix A**.

Bluestone Coke will make the fact sheets available to EPA to post on their website at http://www.epa.gov/region4/foia/readingroom/rcra_community/ERP.html.

4.4 Telephone Information Line

As described in Section 3.2 above, the telephone contact number is 205-808-7712.

4.5 CIP Revisions

The CIP will be updated on an annual basis so as to keep current with the pace of technical work being performed. In addition, the community involvement approaches will be refined if needed to keep current with what works and new involvement opportunities. Both EPA and Bluestone Coke consider the CIP a living document.

5.0 EPA'S COMMUNITY INVOLVEMENT

The EPA, as necessary, will conduct community involvement activities complementary to and to supplement Bluestone Coke's. The EPA will be the face of the technical environmental activities conducted at the site. EPA's activities may include:

- Conducting Public Meetings to discuss specific RCRA milestones;
- Conducting Workshops to discuss the RCRA process;
- Conduct special events as appropriate;
- Public Comment Periods on Corrective Measures or other site activities, as necessary.
